Lawn and Garden; Shrubs, Trees, Hardy Perennial and Climbing Plants; Seeds for the Flower Garden; Seeds for the Vegetable Garden, and Offering You all the Advantages of

A GREENHOUSE, A NURSERY, AND A SEEDHOUSE AT YOUR DOOR

IN THIS CATALOGUE, our new book for spring of 1909, we believe we offer one of the most complete stocks of plants, seeds, fruits and bulbs that can be furnished direct from the grower to the planter. Years of experience in packing plants have resulted in methods which insure their safe arrival, and during our years of business career our products have found their way into every state and territory, and into many foreign countries. We promise you as fine a stock as can be grown, a large assortment and good service, and we believe, therefore, that this catalogue which we hope will be found pleasing, comprehensive and helpful, is entitled to the careful consideration of all buyers and to those who are not yet on our books as customers. With assurances that all orders and communications shall have our most careful, conscientious and prompt attention, we solicit a careful examination of the following pages.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

Springfield, Ohio, is the acknowledged headquarters in the United States for the shipping of plants by mail and express. It is centrally located geographically, with five express companies—American, Adams, United States, Wells Fargo and Pacific, and has unequalled facilities for receiving and shipping orders and procuring the lowest rates to all parts of the country. This gives you the assurance of getting your order in the quickest possible time. Within twenty-four hours we can reach two-thirds of the population of the United States.

Order Early It will greatly facilitate shipments if orders are sent in early. We aim to send off all orders the same or next day after receipt, but during the busy season it is nearly impossible, hence the advisability of ordering early.

Plants Can Be Sent Safely at Any Time We send orders nearly every day in the year—winter, spring and summer—and if we send your order you are protected against any loss in transit by our guarantee, given on this sheet and on the back of order sheet. All orders filled as soon as possible after receipt. Please allow a reasonable time for the execution of your order. We generally ship the day of or the day after receipt, but during the busy season orders are sometimes delayed a few days. Should you write us concerning the order, give date mailed, amount of order and remittance, and if not shipped this will enable us to locate it promptly. **If you wish your order held,** do not fail to write it plainly across face of order sheet.

Guarantee We guarantee all Trees, Shrubs, Plants, Bulbs and Seeds that we send out to be true to name, and to reach purchaser in good condition when forwarded by mail or express (freight shipments at purchaser's risk), and hold ourselves in readiness to replace all stock that may accidentally prove untrue to label, free of charge, or refund the amount paid therefor; but it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not in any case make us liable for a greater sum than that originally received for such stock that may prove untrue. Most failures with Plants, Bulbs and Seeds are due to soil conditions, unfavorable weather and other causes entirely beyond our control, rendering it impossible to guarantee success; and although we will take all possible care to send only such stock as will under proper conditions give satisfactory results, we do not, and should not be expected to, guarantee stock to grow or guarantee results in any way, and we cannot entertain complaints that are not made promptly after receipt of goods.

When You Order Please use the printed envelope and order sheet enclosed. Others will be sent you upon request. Always write your name the same, adding the postoffice, county and state on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

Orders are Promptly Filled or our customers advised by postal card. If you do not hear from your order within a reasonable time, please mail us a duplicate for tracing, stating exact date of original order, amount of money mailed, form of remittance, exact copy of order, also our order number if we have mailed you an acceptance, with your name and full mail address.

If You Wish Orders Held Please say so, then we can book your order (and set items aside for you if necessary) until proper time to ship; otherwise we will send at once or acknowledge their receipt. We work nights when necessary, and always try to ship promptly.

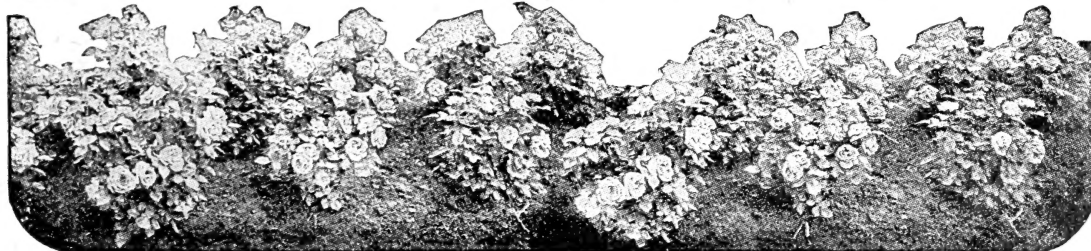

Remittance With Order Please send money with your order sufficient to cover the entire bill, as it will facilitate the execution of your order. During the busy season to make out bills for customers, charge, and in a few days receive the money, make the proper credit and send receipt requires more work than we can readily perform, and if remittance in any case does not accompany the order it should have certified references with it. We must not be expected to send goods C. O. D. unless one-third of the amount is sent with the order to guarantee acceptance.

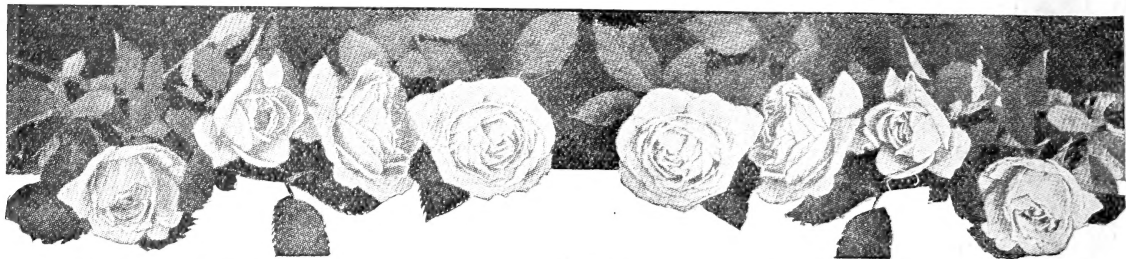

How to Remit Postoffice Orders—The safest and most convenient way of transmitting money from one point to another is by means of postoffice orders. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at most postoffices, but not all. The fee is but five cents for \$5.00 and under.

Loose Money Enclosed in a letter is at the risk of the sender.

Postage Stamps These can be sent for fractional part of one dollar or where postoffice orders cannot be had, provided a two-cent stamp extra is sent with every remittance. None but stamps in perfect order accepted.

Our Prices will compare favorably, we believe, with those of any responsible firm in the United States. We guarantee our goods to give satisfaction, and every shipment is sent out under our guarantee of safe delivery at your door.

Our Nursery Department is separate and distinct from our greenhouse, and it is necessary, therefore, that all items selected from this department, and from pages 76 to 81 inclusive, be shipped direct from our Nursery under separate transportation charges. No garden or landscape is complete without trees and large shrubs, and their proper spacing and arrangement should constitute the basis or foundation upon which all other plantings should be made.

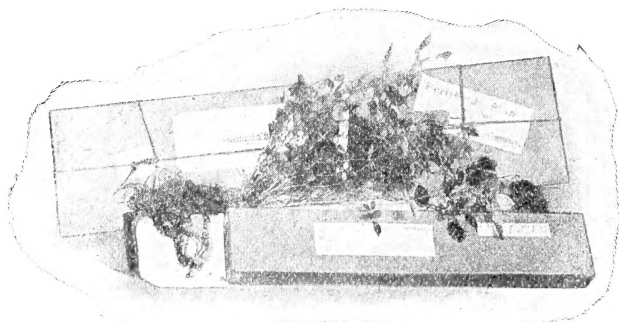

Remember that Nursery Stock is field-grown, and to be of satisfactory size for immediate effect cannot be sent by mail. In forwarding Nursery Stock we will use our best judgment as to shipping by express or freight.

Order Nursery Stock Early, as the plants will be in dormant condition, and should be planted before they start into growth.

Suggestions to Planters Success depends in a large measure on the treatment given to trees and Nursery Stock. Thousands of well-grown, healthy specimens, delivered in first-class condition, are annually lost through neglect and bad treatment. Avoid all unnecessary exposure to the air. The natural place for the roots of trees is in the ground as soon as received they should be heeled in, so that mellow earth will come in contact with all the roots. When planting, take out but few at a time. An hour's exposure to hot sun or drying wind is sure death to many trees. More particularly is this the case with evergreens: when once dried, no amount of soaking can dilate and restore them to their normal condition.

\$3.00 ORDERS PREPAID BY EXPRESS. If we are allowed to remove the soil from the plants, we will send express size plants and prepay the expressage on all orders amounting to \$3.00 or more. It must be stated plainly on the face of your order (See methods of shipping plants on back of order sheet.) This prepay offer does not apply to our Nursery Department.

Plants by Express We have all the principal express companies here—Adams, American, United States, Pacific and Wells Fargo, these connecting with all other express companies, and the lightest possible boxes are used to reduce express charges to a minimum.

Mailing and Light Express Boxes

Special Express Rate for Plants By special arrangements with all express companies, all plants are carried at a reduction, and on account of a graduated scale of rates runs from twenty per cent. to thirty-three and one-third per cent. less than the regular merchandise rate. As this is the largest shipping point for plants in the United States, and all offices are sending out plants every day in the year, and the charges are regulated at the offices here, you will always receive advantage of the special reduction.

Plants by Mail All stock listed in our Catalogue, unless noted, is offered at prices marked, by mail, postpaid, and we deliver all such items free of all expense to any postoffice in the United States.

Premiums (20% additional) Allowed

On \$1.00 worth of goods bought at single rates, select to the value of	\$.20 extra
2.00	.40 extra
3.00	.60 extra
4.00	.80 extra
5.00	1.00 extra

These premiums cannot be allowed on Special Offers, Collections or goods bought at dozen rate or Seeds in bulk.

The above per cent. additional is allowed on mail and express orders alike, but we always add extra plants over and above this per cent. when shipping by express, to help offset the transportation charges.

Lost Orders Letters are sometimes lost in the mails. If you do not hear from us within a reasonable time, please send us a duplicate of your order, stating when and in what form payment was sent, and sign the same name and address as in the first order, so that it may have immediate attention.

Correspondence We invite correspondence on any business topic, and are always glad to give you any information and suggestions on any subject within our knowledge. When writing about plants on an order, write on the order sheet, under the heading "Remarks," and when making an inquiry concerning plants not ordered, use a separate sheet, as our order and correspondence departments are conducted separately. When writing about an order, be sure and furnish complete information, so that it will not be necessary for us to look up records, as this always causes delays.

Change of Address If you have changed, or intend to change, your address, please let us know, and we will change it on our books so that you will receive our Seed Annual at your new postoffice. If you have rural mail delivery, be sure to give the name and number of your route, if necessary, when ordering.

Our Fall Catalogue of imported bulbs, plants and seeds for fall planting and winter bloom will be ready about September 1, and sent to all of our patrons this year without request; to others free on application. If not received promptly, a postal card will bring it.

Errors and Complaints We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business errors sometimes occur, and when orders are received that are in some way damaged or not satisfactory, we wish to be promptly notified of the fact, and will make such an adjustment of your claim as will be satisfactory. When you write us, simply give the nature of your complaint, giving a list of the plants damaged and price paid for them, and state whether you wish these items replaced or the amount refunded. It is nearly impossible to find time in the busy season to adjust your complaints promptly unless you give us all the information required to do so in your first letter.

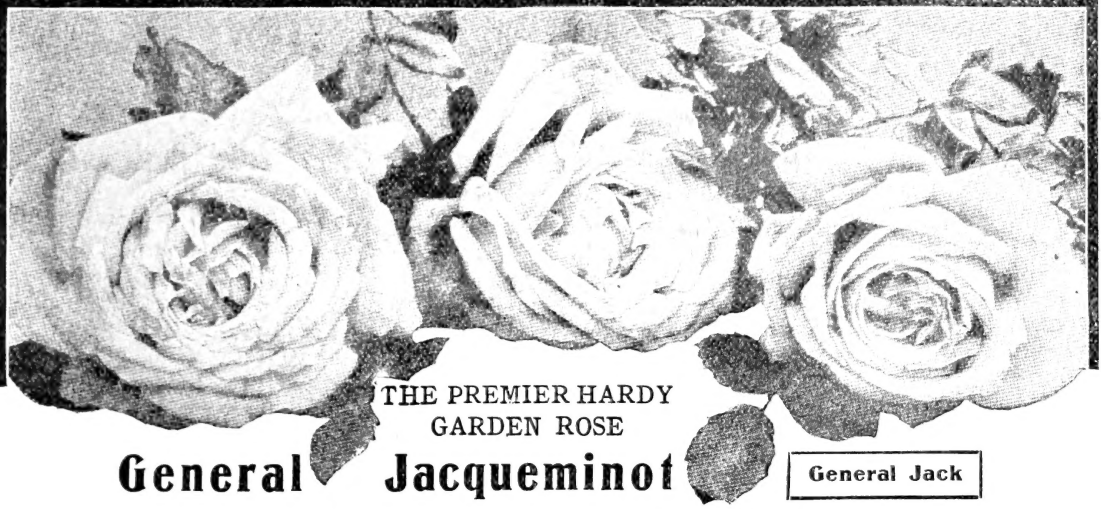

Quality and Service This testimonial is one of hundreds which we receive every season:

The McGregors Brothers Company Hendersonville, N. C.
 Dear Sirs:—For the last three years I have bought of you various plants and have always found them as represented, and by careful management I got such a display, as you will see in the enclosed photograph, and for which collection I received the first "general collection prize" at the North Carolina State Fair. THE PREMIER HARDY GARDEN ROSE

General Jacqueminot

General Jack

(See Illustration in Colors on Front of Cover.)

Famous the world over as one of the most magnificent Hardy Crimson Roses ever introduced. It is a strong, vigorous grower, entirely hardy, an early and abundant bloomer, and both buds and flowers are considered models of perfection, and its brilliant, shining crimson color is the standard of color by which other Roses are judged. In fact, it is almost unequalled in beauty of form and brilliant intensity of color. It is not a new variety, but so valuable that it is frequently scarce and difficult to obtain, as almost everyone wants a "General Jack." This year, however, we believe our stock is ample, and hope to have enough to meet all demands. Price, strong one-year-old plants, own roots, 15 cents each; six for 85 cents; twelve for \$1.50; two-year-old, heavy plants, 40 cents each; six for \$2.00; twelve for \$3.75.

THE QUEEN OF ALL FLOWERS **The Garden Rose**

The name is an inspiration to all garden lovers. They are justly classed among the showiest and best plants for decorating the home grounds. No garden complete without them, no arrangements satisfactory that neglect them; in fact, they are indispensable. We endeavor in this catalogue to present the merits of each variety fairly and faithfully, being cautious not to overpraise—preferring to say too little rather than too much. Recognizing the importance of robust, healthy habit, hardiness and freedom of bloom, combined with beauty of flower, we propagate largely varieties possessing these characteristics, and recommend such kinds for general planting; and we also give due attention to those varieties which are less vigorous and robust, and which therefore require more care to bring them to perfection. In the hands of the Rose lover all kinds amply repay any care bestowed upon them. Our immense stock and great variety of Roses enable us to offer assortments adapted to various purposes; and whenever we can be of any assistance in making selections, our services will be cheerfully given.

We Offer a Grand Collection of

- Teas and Hardy Teas (monthly bloomers). Hybrid Perpetuals (Hardy Garden or June Roses). Hardy Climbing Roses. Polyantha Roses. Wichuriana or Evergreen Roses. Moss and Rugosa Roses. Pre-eminent among which is

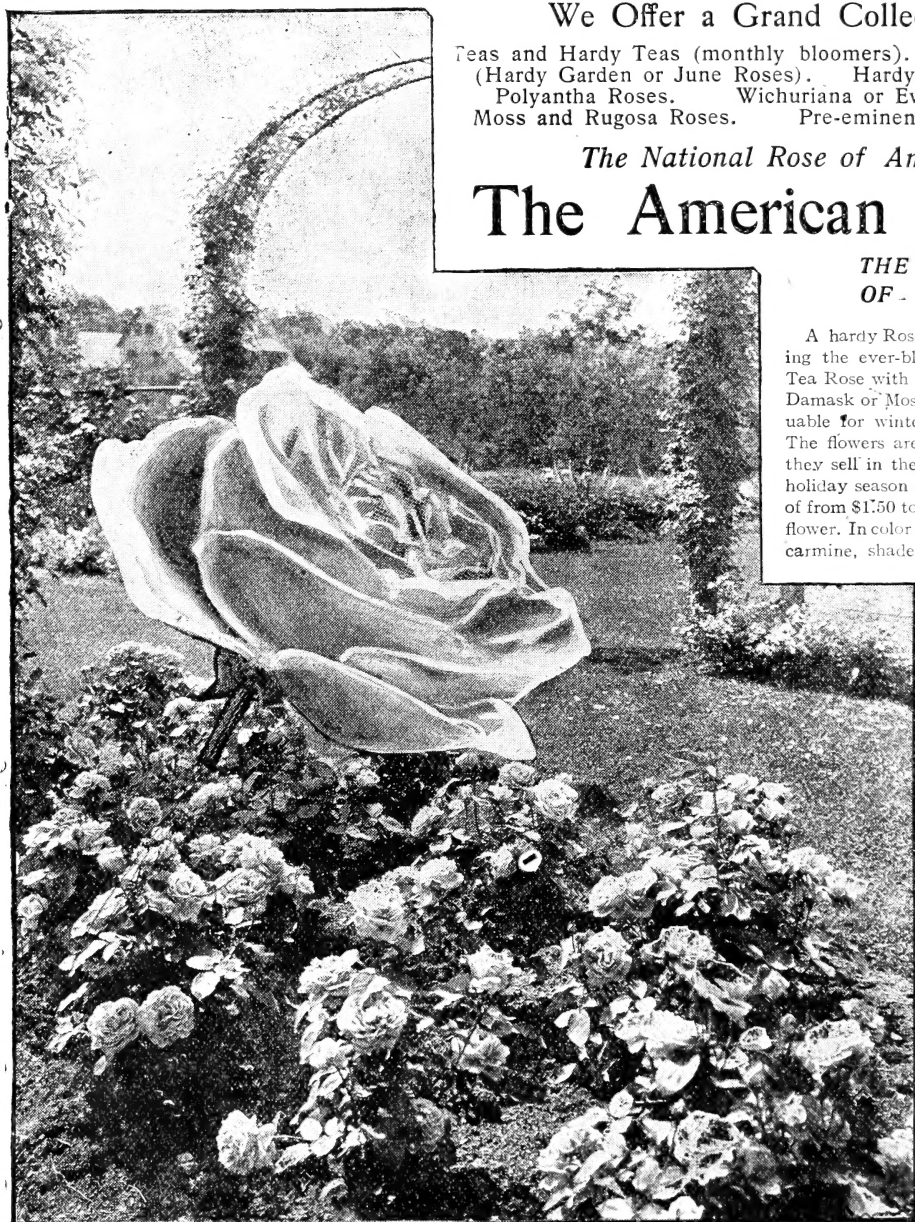

The National Rose of America

The American Beauty

THE GREATEST OF THEM ALL

A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant rosy-carmine, shaded towards the center with rich carmine-crimson. The back of the outer petals take the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as your finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name. (See illustration and prices below.)

Price, one-year-old plants, own roots, 20 cents each, six for \$1.00; two-year-old, heavy plants, 35 cts. each, six for \$1.75, twelve for \$3.50; three-year-old, extra heavy bushes, 50 cts. each; six for \$3.00, twelve for \$5.50.

GRAND NEW HARDY EVER-BLOOMING ROSE RHEA REID WINNER OVER ALL NEW ROSES

This novelty in Roses is a seedling variety of great distinctness of character. The growth is vigorous, throwing out long shoots with rich green leaves, and each shoot bearing a flower well above the foliage. It is a variety which will produce flowers as large as the American Beauty, as double as the grand Rose Bridesmaid, and as fragrant as the beautiful La France. The buds are long, oval and pointed, of a most beautiful rich crimson, and retain their form for a long time. This variety will immediately prove a most valuable addition to the list of forcing Roses, and will soon be seen in the show windows of cut-flower stores in our large cities. Of all the crimson Roses which have been introduced for years, there is none that has measured up better to the ideal standard than Rhea Reid. Highly recommended. Price, 35 cents each; three for \$1.00; seven for \$2.00, postpaid; strong two-year plants, 60 cents each; three for \$1.50.

MRS. AARON WARD

One of the most delightful roses of recent years in a color that catches the eye at once—a deep golden-orange color, shading out to creamy-yellow at the edge of the petals; the buds are cupped and very deep, showing the glowing heart to the best advantage. A fine, strong grower, with dark foliage. Price, fine one-year-old plants, 35 cents each; strong two-year plants, 75 cents each.

MRS. JARDINE

Color bright rosy-pink, shading to salmon-pink on the outer petals and holding its bright color. Has been tested for two years in this country and won numerous prizes at the autumn shows. Gives every promise of proving a popular variety. Price, fine plants, 50 cents each, postpaid.

DEAN HOLE

(Hybrid Tea.) The flowers of the Rose Dean Hole are large, of great substance and fine form; color silvery-carmine shaded salmon, absolutely distinct and by far the finest in its way of color. Price, 25 cents each; three for 60 cents, postpaid; two-year-old plants, 60 cents each.

FREIHERR VON MARSCHALL

Flowers are large, beautifully shaped, double and full, borne in wonderful profusion all through the growing season. The color is bright red. Long, well-shaped buds. As an outdoor Rose it has no superior. Price, 20 cents each; three for 50 cents; seven for \$1.00; two-year-old plants, 40 cents each; three for \$1.10.

MME. MELANIE SOUPERT

(Hybrid Tea.) A good grower, quickly forming a well-branched bush, foliage bronzy-green, flowers very large, almost full and globular; immense cupped petals; color golden-yellow suffused bright pink. An extraordinarily fine rose. Price, 25 cents each; three for 60 cents, postpaid; strong two-year-old plants, 50 cents each.

COUNTESS OF DERBY

(Hybrid Tea.) Center salmon shading into delicate peach; large, full, free and vigorous in growth; buds sharply pointed in the center, stems stiff and upright. Delightfully fragrant. Price, 25 cents each; three for 60 cents, postpaid; strong two-year plants, 50 cents each.

BLUMENSCHMIDT

(Hybrid Tea.) Pure citron-yellow, outer petals edged tender rose, a sport from Franzisca Kruger which it resembles in form, and which has a more vigorous growth. Winner of three first premiums. Price, 20 cents each; three for 50 cents, postpaid; two-year-old plants, 40 cents each; three for \$1.10.

CATHARINE ZEIMET

NEW DOUBLE WHITE BABY RAMBLER—This is surely a beauty and a great addition to the Baby Ramblers. It grows to a height of twenty inches, and produces double pure white flowers in abundance, as seen in photo engraving. It has a fragrance similar to Hyacinths. Of free, compact growth and very attractive. Produces a sheet of white color. Price, 20 cents each; three for 50 cents, postpaid; two-year-old plants, 40 cents each; three for \$1.00.

Price, strong one-year plants, 20 cents each, postpaid; two-year plants, 40 cents each.

An Unequaled Collection of
MONTHLY BLOOMING
Garden Roses

**THE FIVE GRAND
COCHET ROSES**

If you want five of the finest hardy ever-blooming Roses for outdoor cultivation, varieties that will produce hundreds of superb flowers throughout the growing season, order the five COCHET ROSES. No matter where you live, they will give you perfect satisfaction. They are absolutely the best Roses in the world.

PINK MAMAN COCHET (The Queen of all Pink Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well nigh marvelous. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two-and one-half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Perfectly hardy in all sections of the country. The color is clear, rich pink, changing to silvery-rose. **Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for \$1.00; \$2.50 per dozen.**

WHITE MAMAN COCHET—This most superb variety is identical with its parent Maman Cochet, except in color, which is snowy-white, sometimes faintly tinged with the slightest suggestion of pale blush. With the same freedom of bloom, magnificent form of buds and flowers, and hardiness, it stands at the head of the list as the best white Rose for open-ground culture. It has the vigor of an oak, being hardy everywhere. **Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for \$1.00; \$2.50 per dozen.**

RED MAMAN COCHET (Helen Gould)—Grows in almost any soil or situation, and produces its superb flowers in amazing profusion on long, strong shoots. For vigorous growth and freedom of bloom, better than American Beauty, and without a peer. The flowers are full and perfectly double, the buds beautifully made, long and pointed. Color warm rosy-crimson. Hardy everywhere. **Price, strong one-year plants, 15 cents each; four for 50 cents; \$1.25 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.**

YELLOW MAMAN COCHET (Our Grand New Rose)—This variety is absolutely the best hardy ever-blooming yellow Rose in existence. In the open ground, it is superb—a typical Cochet Rose, with its gracefully molded buds, magnificent open flowers, stiff, strong stems, heavy foliage, and with the vigor of growth and blooming capacity that has made the Cochet Roses the best of their class and color. **Price, strong one-year plants, 20c each; three for 50c; \$1.50 per dozen, postpaid. Two-year-old plants, 35 cents each; six for \$1.75; \$3.00 per dozen.**

CRIMSON MAMAN COCHET (Etoile de France)—This rose has been named descriptively Crimson Maman Cochet, because its vigor of growth, stiff stems, heavy foliage, freedom of bloom, and its hardiness fully entitle it to become a member of the Cochet family. It makes a fine upright bush, has but few thorns, and beautiful, deep bronzy-green foliage. It is as free flowering as any Tea or Polyantha Rose, bearing its massive, large, full, cup-formed flowers singly, on long, stiff stems; the color is new, clear, red or crimson velvet, brightening in the center; the flowers are the most splendid substance, and exquisitely fragrant. **Price, strong one-year plants, 20 cents each; three for 50 cents; \$1.50 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.**

SPECIAL OFFER No. 107—One each of the Five Cochet Roses, postpaid, for 70 cents; two-year plants, one each of the Five Cochet Roses for \$1.50.

We have given this Rose an extended trial, and believe there is no better white Rose grown. The buds are of good size, the flower full and double and deliciously fragrant, pure porcelain-white, with deep center. Price, 15 cents each; two-year-old plants, 30 cents each; \$2.75 per dozen.

Red Soupert (Ma Petite Andre)

A dwarf, bushy grower and immense bloomer; flowers bright red and perfectly double. 10 cents each; \$1.00 per dozen, postpaid; two-year size, 30 cents, by express; \$2.75 per doz.

The Beautiful New Pink Soupert

This bright new Rose is a very free-flowering variety, much resembling Hermosa, but more double and flowering more freely; it shows the Polyantha blood in the full cluster of bloom, and it will make a handsome contrast, bedded or grown with the Clothilde Soupert. The flowers are not quite so large, full and handsome as our original Soupert, but fill a place because of their brightness and freedom. The habit of the plant is almost identical with Clothilde Soupert. Price, 15 cents each; \$1.35 per dozen, postpaid; two-year-old plants, 30 cents each; \$2.75 per dozen.

The Four Grand HERMOSA ROSES Hardy, Ever-blooming

HERMOSA, The Old Favorite—Everybody knows this famous variety. As hardy as an oak, and always covered with its elegant clear pink blooms; there is not a shade of color of any kind to mar its purity; we doubt if any Rose ever grown will take its place. Price, 15 cents each; \$1.35 per dozen; large two-year-old plants, 30 cents each; \$2.75 per dozen.

WHITE HERMOSA MARIE LAMBERT—Pure white. It has been called the White Hermosa, as it resembles Hermosa in form and freedom of bloom, and is quite as valuable; for, though no claim has been made for it as a fancy Rose, its persistence in bloom will make it a very popular white variety for bedding or for pots. This Rose is fast becoming popular, as there is no better white Rose. It is the finest blooming white Rose we offer. Price, 10 cents each; \$1.00 per dozen; large two-year-old plants, 30 cents each; \$2.75 per dozen.

YELLOW HERMOSA COQUETTE DE LYON—This is a most charming yellow Tea Rose; a grand grower, has elegant buds, and is so free in flower as to be called the Yellow Hermosa. This is the best blooming pure yellow Rose in our catalogue. We sold of this Rose the past spring 35,000 plants. It is a Rose that will please all. Price, 10 cents each; \$1.00 per dozen; large two-year-old plants, 30 cents each.

CRIMSON HERMOSA QUEEN'S SCARLET—This, without doubt, the very best of all red Roses for bedding. It can be planted anywhere, being entirely hardy. The flowers are of large size and of a fiery scarlet, a color seldom seen in Roses. Indeed, a bed of this Rose produces a mass of red equal to a bed of Geraniums. It is planted everywhere on account of its color and freedom of bloom; none better; try it. Price, 10 cents each; \$1.00 per dozen; large two-year-old plants, 25 cents each; \$2.55 per dozen.

SPECIAL-OFFER No. 120—The Four Hermosa Roses for 40 cents, postpaid; or the four in large two-year size for 95 cents.

GRAND COMBINATION OFFER No. 121—Eight Splendid Roses (all on this page) for a bed to bloom all summer, one-year size, postpaid, 80 cents; two-year size, \$2.10.

The
Great New German
Rose

Tausendschön Thousand Beauties

TAUSENDSCHON, which in German means Thousand Beauties, is a very appropriate name to give this great novelty. We are free to predict that Thousand Beauties will become the most sensational climbing Rose yet introduced, not barring the great Crimson Rambler. Imagine a Rose producing on the same bush so many different colored flowers that it is impossible to describe or even picture the variations. A single cluster of flowers is a whole bouquet in itself, hence the very fitting name, "Thousand Beauties." Blooming profusely from the beginning of June until the last of July, the flowers appear in large clusters, ten to fifteen in a cluster, are of splendid size and quite double. The colors run from delicate balsam or tender rose through the intermediate shades of bright rose and carmine, with white, yellow and various other delicate tints showing. There is no other Rose in cultivation like it. It is a strong grower, with but few thorns, magnificent foliage, a valuable feature in itself, impervious against mildew and absolutely hardy in the open ground anywhere. Wherever shown it has created a veritable sensation, and has been awarded numerous medals. For climbing over porches, bowers, pergolas or trellises, or for single specimens or pyramids, it will please you from the day you plant it. **Price, 20 cents each; three for 50 cents; \$1.75 per dozen, postpaid; large two-year-old plants, on own roots, 40 cents each; three for \$1.00; \$3.50 per dozen.**

CHARMING POLYANTHA OR FAIRY ROSES

ESPECIALLY ATTRACTIVE FOR CHILDREN

These are a lovely and distinct class of Ever-Blooming Roses, highly valued for their dwarf, bushy growth, and medium size double flowers, which are very fragrant and borne in such large clusters that the whole plant seems a sheet of bloom. They are very pretty and desirable for bedding and general planting. Not entirely hardy, but usually stand the winter with protection. Price, one-year plants, 10 cents each; two-year plants, 25 cents each.

Bloom in clusters, making a well-grown plant look like one large bouquet. Almost hardy, requiring but slight protection, even in most severe winters.

Mignonette

A lovely Fairy Rose; full, regular flowers, perfectly double and delicately perfumed. Its color is a clear, delicate rose, with a frequent and peculiar intermingling of white.

Perle d'Or

Beautiful light yellowish-salmon, deeper in the center, with small white edges. Blooms in clusters, medium size, of fine form and texture.

Primula

The flowers are pure white, about one inch in diameter, flowering in clusters. Very full, prettily formed, resembling blossoms of the double white Primrose in profusion of bloom.

Primula Polyantha

New. A very showy, low-growing little bush, completely covered with cup-shaped flowers, semi-double, which are Chinarse at the edges and snow-white in the center. This arrangement of the color reminds one of the Chinese Primrose. A pretty bedding plant.

SPECIAL OFFER NO. 122 The Four Polyantha or Fairy Roses, one-year plants, for 35 cents; two-year plants, for 85 cents.

ROSES

THE NEW CRIMSON RAMBLER PHILADELPHIA

THE MOST MAGNIFICENT HARDY CRIMSON CLIMBING ROSE IN EXISTENCE.

SPLENDID flowers, two and one-half inches across, perfectly double. Borne in grand clusters, completely covering the whole bush. Color pure, deep, rich crimson, far brighter and more intense than the old "Crimson Rambler," which has heretofore been the standard for brilliant color. The PHILADELPHIA does not fade, bleach or wash out, but holds its bright, dazzling color to the last, which adds greatly to its value. Has handsome foliage; does not mildew, and is a most abundant bloomer. Undoubtedly the brightest and best of all Hardy Crimson Climbing Roses yet introduced; unequaled for covering porches, trellises, screens, fences, etc. Is a strong, quick grower, perfectly hardy, needs no winter protection and bears "bushels of Roses" every season without attention. The "Philadelphia" is the finest Hardy Crimson Climbing Rose yet produced. Price, strong one-year-old plants, 15 cents each; two for 25 cents; six for 70 cents, postpaid; strong two-year-old plants, 25 cents each; two for 45 cents; six for \$1.15. Extra large, field-grown plants, 50 cents each; two for 90 cents; six for \$2.50; \$4.50 per dozen; by express only.

SPECIAL OFFER No. 124—One each of the Rambler Roses, Philadelphia, Popular Crimson, Yellow and Dorothy Perkins in the one-year size for 50 cents, postpaid. Or in strong two-year-old plants for 90 cents.

THE POPULAR CRIMSON RAMBLER—The plant is of a very vigorous growth, making shoots from eight to ten feet during the season, rendering it a charming pillar Rose. It is also magnificent in bush form; color is the brightest crimson, which remains undimmed to the end. The flowers are produced in great pyramidal panicles, or trusses, each carrying from thirty to forty blooms, the individual flowers measuring about one to one and one-half inches in diameter. The foliage is a bright green and glossy, and contrasts finely with the bright crimson of the flowers. Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; \$2.00 per dozen; large three-year-old plants, field grown, with canes three to five feet, 50 cents each, by express only; six for \$2.50; \$4.50 per dozen.

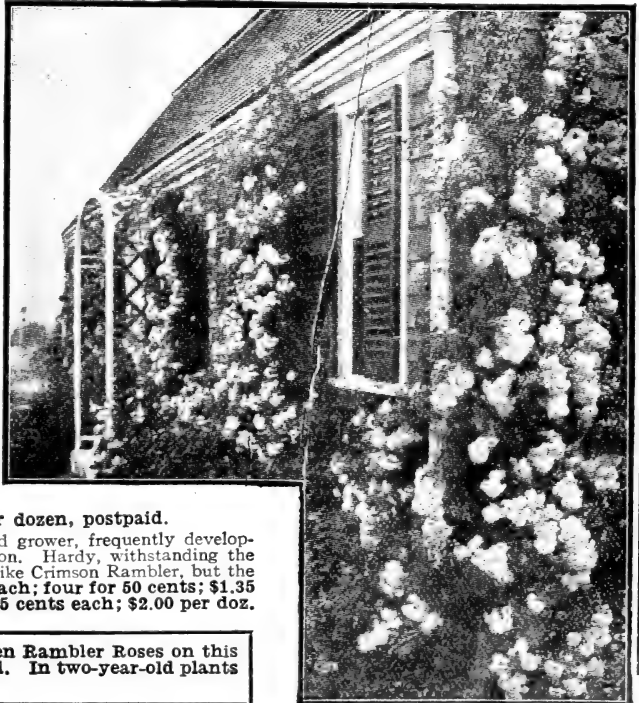

YELLOW RAMBLER—The flowers are borne in immense clusters, after the same manner as the Crimson Rambler. The color is a decided yellow. Many Roses which are described as yellow have really only a creamy tinge, but the Yellow Rambler is clear, decided yellow. The flowers are very sweet-scented. Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; \$2.00 per dozen.

SHELL-PINK RAMBLER ROSE LADY GAY—This new variety, a seedling from the popular Crimson Rambler, closely resembles it in habit of growth and general effect. Flowers are of a delicate cherry-pink, which gradually changes to a soft-tinted white. The plant is a strong, vigorous grower, with profuse, glossy, deep green foliage. Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; large two-year-old plants 25 cents each; \$2.00 per dozen.

PINK RAMBLER (Euphrosyne)—What is said of White Rambler applies equally to this except the color of the flowers is pure shiny rose—the partially open buds being bright, light carmine. Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; \$2.00 per dozen.

THE BEAUTIFUL NEW WHITE RAMBLER (Thalia)—Of German origin, and in habit of growth, foliage, manner of blooming, form of flowers and hardiness identical with Crimson Rambler. Flowers are pure snow-white and sweetly scented. Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; strong two-year-old plants, 30 cents each; three for 85 cents; \$2.25 per dozen, postpaid.

DOROTHY PERKINS—Beautiful shell-pink. A rapid grower, frequently developing shoots from ten to fifteen feet long in one season. Hardy, withstanding the severest winters without injury. Blooms in clusters like Crimson Rambler, but the flowers are more double and large. Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; large two-year-old plants, 25 cents each; \$2.00 per doz.

SPECIAL OFFER No. 125—One each of the Seven Rambler Roses on this page in the one-year size for 90 cents, postpaid. In two-year-old plants for \$1.50.

The Six Most Popular Creeping and Trailing Hardy Memorial or Evergreen Roses

Especially Recommended for Cemetery
Planting

Sometimes called the **Wichuraiana Roses**, but appropriately classed as "Memorials," because everywhere acknowledged to be the most suitable and satisfactory Roses one can get for cemetery planting. They will climb when trained, or if left alone they creep along the ground as closely as an Ivy and make a dense mat of shiny, dark green foliage. The leaves are of leathery texture, practically insect proof, and remain green on the plants nearly all winter. They bloom in profusion during June and July, and the single ones bear red berries in the autumn. A growth of ten feet in a season is not unusual, and all are entirely hardy, and when once planted take care of themselves. They are excellent for training over graves or over rough ground, rocks or stumps. Some prefer them to the Hardy Climbing Roses for covering arbors, fences, archways, etc., because their foliage is so attractive and stays green till midwinter. (See prices below.)

The Beautiful Memorial Rose. Rosa Wichuraiana

The flowers, which are borne very profusely during July, are large, pure white, single, with yellow center, and have a strong, Wild Rose fragrance. It is one of the very best plants for rock work, embankments, slopes, cemeteries, etc. **Price, 10 cents each; \$1.00 per dozen; two-year-old plants, 25 cents each; \$2.50 per dozen.**

Manda's Triumph

The gem of all the collection and may well be called the Double Memorial Rose. Very large, double flowers, fully two inches across, pure white, finely formed and sweetly fragrant, borne in large clusters. **Price, 10 cents each; \$1.00 per dozen; two-year-old plants, 25 cents each; \$2.50 per dozen.**

Pink Roamer

Its beautiful flowers are single, very large, brilliant, rich pink with prominent orange-red stamens, and delightfully sweet scented. **Price, 10 cents each; \$1.00 per dozen; two-year-old plants, 25 cents each; \$2.50 per dozen.**

Wm. C. Egan

The Best Red Bedding Rose of a Century PRODUCES A CONTINUOUS MASS OF BLOOM

BABY RAMBLER

(Madame Norbert Levasseur)

Dwarf, Hardy, Perpetual-Flowering Crimson Rambler

The descriptive name of this extremely valuable new Rose, "Dwarf Crimson Rambler," seems a misnomer, yet nothing is more appropriate, for the fame of "Crimson Rambler" properly belongs to it. It forms compact bushes about two feet high when fully grown, and is fully covered with clusters of its rich crimson-red flowers throughout the season. It begins to bloom when in small pots and is practically never out of bloom for the balance of the season. **Perfectly hardy**, it requires no winter care, and should improve each year with good culture. The coloring is brighter and more persistent than in its parent, the "Crimson Rambler," of which it is a seedling. The size of the clusters and the number of flowers in each are the marvel of all beholders. Its use is varied so as to render it invaluable. As a bedding variety, to make a low, attractive hedge, to border a walk, for planting in cemeteries, or for growing in pots in the house, it stands alone and must find its way everywhere. Remember it is **hardy and perpetual flowering**. **Price, 15 cents each, two for 25 cents; \$1.00 per dozen, postpaid; two-year-old plants, 35 cents each; three for 90 cents; \$2.50 per dozen.**

Hardy HYBRID PERPETUAL ROSES For General Planting

These are the tall-growing, superb June Roses, with a profusion of large, bright-colored and highly scented flowers during that month. If cut back judiciously when these flowers fade, successive stems of good flowers will follow at intervals all summer. They require rich soil, full sun and good cultivation in order to produce the grand flowers, with sturdy four to five foot stems that Rose-lovers exult over. Light pruning gives more and smaller flowers on shorter stems. All are very hardy and vigorous, requiring protection only in very cold climates.

Paul & Sons, the celebrated English Rose growers, and awarded two first-class certificates by the Royal Horticultural Society. Flowers very large, color flesh, shaded in center to rosy-pink. IT IS BEST TO PROTECT ALL ROSES

Although we try to carefully explain in the introduction to each family or class whether the Roses in that class are hardy or not, the safest way is to protect all your Roses, for it will do no harm to the hardiest, and where manure is used as a covering it also serves the purpose as a fertilizer. After the leaves have fallen give the beds a covering of manure, straw, cedar boughs, corn fodder, leaves or street sweepings, enough to keep the roots from freezing but still not to smother the plants. In very cold localities it sometimes pays to wrap the entire bushes in straw or bend them down to the ground and fasten them to stakes driven for the purpose; or cover with boards, as the principal object is to keep the plants dry and from the freezing and thawing at times of storms and sleet and rain. But the matter of protection is not such a serious problem these days when good new Rose plants can be obtained at a very low price. Many people feel that the blossoms produced the first season are worth many times the cost of the plants, and so buy new ones each year.

INSECTICIDES, FUNGICIDES, FERTILIZERS AND GARDEN REQUISITES

Insects may be divided into two classes. First, the chewing, gnawing and biting insects; and second, sucking insects. Those of the first class eat the foliage or fruits, or gnaw off the stems and flowers of the plant. Whether they are bugs, worms, caterpillars or slugs, they are best destroyed by some poison applied on the surface of their food plants, as Paris Green or Hellebore. If for any reason it is not deemed safe to use these poisons, Pyrethrum (Persian Insect Powder) or Tobacco Dust should be used.

For those insects classed under the sucking insects, such as Scale, green and red Spider and Mealy bugs, must be killed by insecticides, which are either irritants and which produce death by coming in bodily contact with the pest, or substances that close up the breathing pores and produce suffocation.

An examination of the breathing organs of many insects reveals a system of air tubes extending to all parts of the body; and such insects should be treated with Kerosene Emulsion, Tobacco Dust or Pyrethrum (Persian Insect Powder).

Begonia Rex *King of the Begonias*

We make a specialty of this marvelous family of plants and offer a collection of the finest varieties, including new and rare kinds that cannot be had elsewhere. They require light soil composed of rich loam, loose woods earth and sharp sand. They like a moist, warm atmosphere, and should be kept shaded during the summer. Do not allow the sun to strike the leaves when wet, or do not over-water. Be sure to try a few of these wonderful plants.

Speculata Quite a novelty in the Rex type. Leaves are in the form of a grape leaf. Color is a bright green, with a background of chocolate; veins of a light pea-green, the whole leaf spotted with silver. The individual pink blooms are lifted high and spray-like quite clear of the foliage. **Price, 10 cents each; three for 25 cents.**

Duchess De Brabant This fine variety is very distinct, having a dark greenish-brown center, with a broad silver band enclosed with a dark green edging. The edge of the leaf is smooth and very pointed. **Price, 20 cents each; three for 50 cents.**

Lord Palmerston One of the best and easiest to grow of all the Rex Begonias. The leaves are extra large with a dark bronze center, silver band and irregular bronze border, blotched and specked into the silver. **Price, 20 cents each; three for 50 cents.**

Mme. Treve Very highly colored, especially when the light shines through the leaf which makes it a bright red. The star-shaped center and the narrow border of the leaf is a reddish-green dotted with silver spots, and the balance silvery-white. **Price, 20 cents each; three for 50 cents.**

Magnifica This beautiful variety is quite different from any variety we catalogue. The leaves grow to an immense size; color a rich dark chocolate-brown tinted with dark green. This variety is one of the darkest of all the Rex family. **Price, 20 cents each; three for 50 cents.**

King of Rex One of the most effective of its class, though the oldest variety. Of a beautiful metallic luster, center and edge a soft velvety-green, with a broad silver zone terminating at the point. It is of the very easiest culture. **Price, 15 cents each; three for 40 cents.**

Roi Ferd Major Extra large leaf of fine silver, small dark starry center, and edge embroidered in the same dark shade. Extra fine. **Price, 15 cents each; three for 40 cents.**

Ruth Findlay A very short, bushy-growing variety. The most part of the leaf is of a silver color streaked with dark green on the edges. A very pointed leaf with a hairy growth on the edges. **Price, 15 cents each; three for 40 cents.**

Lesoudsii This is the finest and largest of any of the Rex family. It is impossible to describe in words the beautiful markings of this magnificent Begonia. It is a cross between Begonia Diadema and a Rex variety, but retains in a marked degree the Rex character. **Price, 15 cents each; three for 40 cents.**

Rubrum The entire leaf has a pinkish metallic luster, which makes it one of the most attractive varieties. The leaf is very large, with a smooth edge, and the plant is a vigorous grower. **Price, 15 cents each; three for 40 cents.**

Bertha McGregor

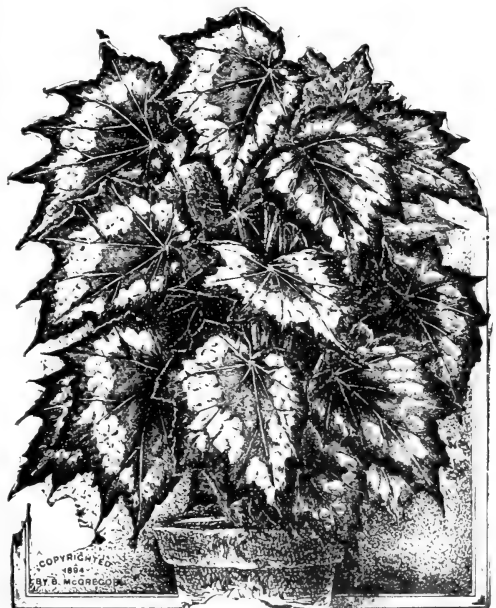

This new Begonia is known to be and acknowledged by all the leading Begonia growers of the United States to be the best all round Begonia in the Rex family. CHRYSANTHEMUMS

CHRYSANTHEMUMS are of Japanese and Chinese origin, and are by far the most gorgeous and elegant of our fall blooming plants. Through the enterprise of American growers, who have given them time and devotion, they have, as if by magic, so developed as to give them the unquestioned title of "Queen of Autumn Flowers." For massive blooms, grandeur of color, ease of culture and certainty to flower, either in the open ground or in pots, there are no plants that will surpass them, and but few their equal. The season of bloom lasts up until severe frosts. It is a pleasing thought to anyone who may have poor success with flowers to know, whether other plants bloom or not, the Chrysanthemum will put forth some sort of a flower if the plant is only a few inches high. The endeavor of nearly all growers has been, in late years, to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is of these varieties that our list is made up. Every sort we offer, if well grown, should prove a prize winner.

Chrysanthemum Novelties

The varieties offered below are the very latest and best introductions. They are selected from the prize winners of the late exhibitions, where they won first honors.

Golden Eagle

A new variety which will prove one of the most valuable yellow Chrysanthemums ever introduced. It will prove as great a favorite as the grand yellow Major Bonaffon. This sort has been fairly tested this year, and at the Chrysanthemum shows the large vases of it are attracting unusual attention. The color is a deep yellow, flower of compact, incurved form, with a strong stem holding the flower quite erect. The foliage grows well up to the flower. This variety was awarded the sweep-stake prize at the Chicago Chrysanthemum Show. Price, 35 each, three for \$1.00, \$3.00 per dozen, postpaid.

Lynwood Hall

A glorious new Chrysanthemum, glistening snow-white, of the largest size, perfectly incurved, of elegant finish, and with stiff stems and beautiful foliage. Was awarded first prize over all competitors at the New York show. Its fine color and size will make it a remarkable commercial sort. This variety is heartily recommended. Price, 25 cents each, five for \$1.00, \$2.25 per dozen, postpaid.

A. J. Balfour

A grand Japanese variety. Color rose-pink, quite distinct, broad petals of great substance; nothing compared with it in color, and it is a variety that will quickly become immensely popular. Price, 20 cents each, six for \$1.00, \$1.75 per dozen, postpaid.

Miss Clay Frick

This is a white sport from the grand prize-winning variety, Wm. Duckham. The flowers are incurved with bright petals, very large and held up by strong stems with good foliage. Price, 20c each, six for \$1.00, \$1.75 per dozen, postpaid.

New Chrysanthemums

Price, any variety, 15 cents each, three for 40 cents, \$1.35 per dozen.

OCTOBER FROST—A pure white, with broad, slightly incurved petals. Strong grower, with heavy foliage, and one of the earliest to flower.

BEATRICE MAY—A beautiful incurved Japanese variety; color white, flushed with pink.

DR. ENGUEHARD—One of the leading pink varieties. Color a deep, clear pink, much darker shade than any other listed. Incurved, with broad petals, the lower ones drooping as the center opens. An exceedingly strong grower.

Mlle. JEANNE NONIN—Resembles that popular variety, Timothy Eaton. Color a pure snow-white; a dwarf grower, with heavy foliage.

LORD HOPETOUN—A very handsome flower of the richest scarlet-crimson, with shining gold reverse; when fully expanded the center petals show the gold, while the outer petals reflex, thus showing the lovely crimson shade.

OCTOBER SUNSHINE—This fine variety eclipses all other early flowering golden-yellows; the petals are incurved.

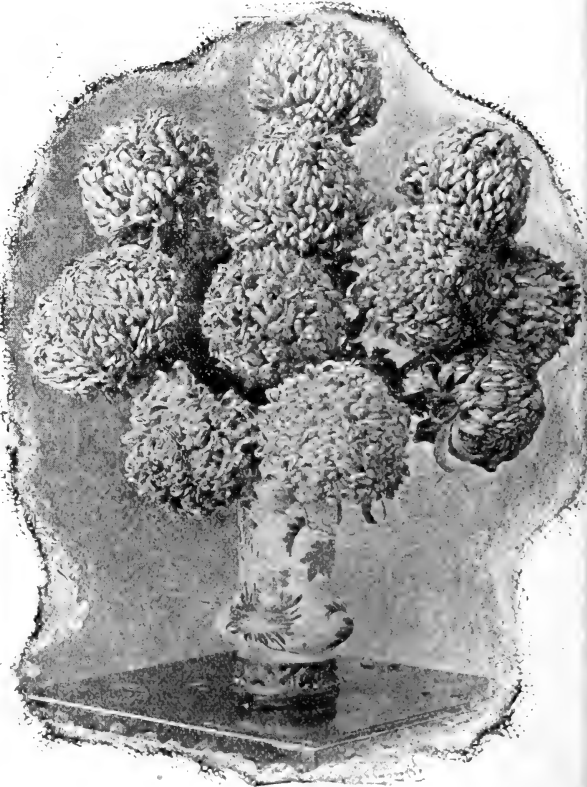

SPECIAL OFFER No. 157—One each of the New Chrysanthemums, by mail, postpaid, for 80 cents.

Growing Chrysanthemums in the Yard and Garden

The Chrysanthemum is of easy culture, but to secure fine blooms and strong plants, with healthy foliage, certain rules must not be lost sight of, and care and attention while the plants are growing must be given. There is probably no plant cultivated for its flowers, which is capable of greater possibilities, and year after year the blooms are becoming finer, better in color, size, form and in every way, showing that the time and study which is being given to them is not in vain.

To bed out Chrysanthemums with the purpose of having them bloom out of doors, procure good, strong young plants in the spring.

As soon as danger of frost is over, plant the Chrysanthemums out in a bed, in good, rich soil, in a well drained location. When the plants get to be eight or ten inches high, nip out the tops to make them branch. When branches start out well from the top, and are several inches long, nip the tops of them also, in order to induce more branches. This should not be continued later than the 1st of August, as, in about a month from that time, they will begin to make buds. When the buds appear, if large flowers are wanted, allow only one, the center bud, to remain on each branch, but if quantity is wanted and not quality they may all remain, but the flowers will be much smaller. As soon as it is time for frost, the plants should be protected at night to keep them from being touched.

CARNATIONS

*The Best Varieties
for the Garden*

The Carnation is among the most popular of flowering plants. Its most beautiful flowers, with their delicate fragrance, make it a very desirable plant for everyone. If grown indoors it should be kept in a cool room, given plenty of light, and its soil not so light as to become water-soaked. If planted out of doors, keep soil well stirred, and cut the plants back as they make flower stems, so as to make them short and bushy. Take up the plants about the first of September, and pot them ready for winter flowering. See to it that there is plenty of drainage in the bottom of the pot and let the first watering be a good one. Keep them well shaded for a few days, and bring them to the light gradually. The plants we offer on this page are young plants from two-inch pots. Planted out in Spring they should begin blooming about July or earlier.

Gorgeous Flowering Cannas

Bronze, Green-Leaved and Orchid Flowering.

THE BEST VARIETIES OF RECENT INTRODUCTION.

For glaring, gorgeous color, grand foliage and profusion of bloom there is nothing equal to Cannas. They are easily grown, attaining large size in ordinary soil. For summer blooming they are unequaled. They are not hardy. Plant after all danger of frost is past, and take up again when the tops are killed by frost, and store away in a cool, dark place. Height when full grown is indicated after each variety.

THE GRAND BRONZE LEAVED CANNA "WILLIAM SAUNDERS"—(4½ ft.) It is a cross between the famous bronze leaved "Brandywine" and "Mount Etna." In dedicating it to Dr. Wm. Saunders, of Ottawa, Mr. Wintzer, the originator says of it: "Of the many thousands of hybridized seedlings produced by me, none approach nearer the ideal *Canna* than this peerless variety." The flowers are bright scarlet, produced in great clusters often a foot across and each on branching stems about four feet high. Individual flowers, often five inches across, of remarkable substance and durability. It is a strong, vigorous grower and self cleaning, which also means fresh flowers every morning from June till frost. Price, strong plants, 50 cents each, postpaid; three for \$1.25; \$4.50 per dozen.

BUTTERCUP—(3 ft.) True bright buttercup yellow; large, beautifully formed flowers in fine, large, handsome trusses; stands unfavorable weather better than most any other kind and always shows up bright and clear and is undoubtedly the most beautiful pure bright deep canary-yellow *Canna* in existence. Price, strong plants, 35 cents each, postpaid; three for 95 cents; \$3.50 per dozen.

SNOWY WHITE CANNA "MONT BLANC"—(3½ ft.) Mont Blanc is to-day, by all odds, the finest White *Canna* in commerce; in fact there is no other variety that can compare with it. It has a vigorous constitution; blooms early and continuously in the greatest profusion during the whole growing season. Its foliage is bright glossy green, very large and handsome, and so thick and leathery it is not often injured by rain or wind. It is a strong-growing variety, and will produce from fifteen to twenty flower stalks in a season. Its great masses of snowy-white blossoms contrast finely with the splendid crimson and pink varieties, making the most gorgeous and showy flower beds for the lawn or garden it is possible to have. Strong plants, 25 cents each, postpaid; three for 65 cents; \$2.50 per dozen. See also combination offer below.

SPECIAL OFFER No. 166—One each of the three Novelties in Cannas, Wm. Saunders, Buttercup and Mt. Blanc for \$1.00, or three of each for \$2.50, postpaid.

GLADIATOR—(5 ft.) (Sometimes called improved Florence Vaughan.) An exceedingly strong, vigorous grower, with fine green foliage and large heads of flowers that stand the storms and hot sun-shine better than any *Canna* unless it is Buttercup. Blooms early and late, flowers yellow spotted with rich scarlet. Price, established plants, 20 cents each, postpaid; three for 50 cents; \$1.75 per dozen.

ALSACE—Creamy-white *Canna*, (4 ft.) Until the introduction of the new white *Canna*, Mt. Blanc, Alsace was the nearest approach to a pure white variety. This variety is still in great demand owing to its low price and magnificent contrast it produces when planted with other Cannas, especially in large rows and beds. Price, established plants, 15 cents each, postpaid; three for 40 cents; \$1.50 per dozen.

DAVID HARUM—(3½ ft.) One of the best of the bronze leaved Cannas; is of a strong growth; flowers of bright vermilion-scarlet mottled with deep red. Price, established plants, 20 cents each, postpaid; three for 50 cents; \$1.75 per dozen.

J. D. EISELE—(3½ ft.) Bright vermilion-scarlet, overlaid with orange; a fine bedder. Height three and a half feet. Green foliage. Price, established plants, 20 cents each, postpaid; three for 50 cents; \$1.75 per dozen.

MARTHA WASHINGTON (The New Pink *Canna*.)—(2½-3 ft.) This is a gem of the first water, of a dwarf habit, foliage rich bright green, broad and very beautiful. The color is a pure pink, a little lighter shade than Mile. Berat. From our experience of the past season, it has proved the freest bloomer of our list. The dwarf habit makes it exceptionally fine for planting in masses or for bordering. Price, established plants, 25 cents each, postpaid; three for 40 cents; \$1.50 per dozen.

DECORATIVE FERNS

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and sometimes oddly shaped. Fronds have a graceful effect produced by few other plants. With practically the same care as given flowering plants they do exceedingly well in the parlor and conservatory. The Ferns of the Pteris family do as well as the Sword Ferns; the best varieties for the house are to be found in the Pteris family. The Nephrolepis family, of which the well-known Boston is a member, has furnished us so many beautiful species of late years and are succeeding so well that this family is steadily growing in popularity. The varieties we list on this and the following page are all recommended for indoor growing in pots as specimens or for ferneries for table decoration. Ferns should be planted in a good light soil with some sand and leaf mold added, see to it that wherever planted they have good drainage.

Nephrolepis Whitmanii

The best of the Crested Ferns. (See cut.) We never sold a Fern that has created so much favorable comment as the Whitmanii. It seems to delight in hot weather and hence seems to be perfectly at home here in the summer. Whitmanii is of dwarfier growth, but equalizes matters by compactness and a wider, stockier shape. Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each, postpaid. Specimen plants, 75 cents.

Nephrolepis Piersoni Elegantissima or Tarrytown

This is a sport from the Pierson Fern, in which the plummy peculiarity of the original form is even more distinctly developed than in the original; the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each, postpaid. Specimen plants 75 cents.

Fern Nephrolepis Whitmanii

Nephrolepis Scotti

It is in essence a condensed form of the Boston Fern, with valuable characteristics added; which are not evident in the parent, an average plant in an eight-inch pot having 200 fronds. The fronds of the plant described average about twenty inches in length and three inches in width at the widest point; the pinnae are very closely set, so that they overlap, making a more finished frond than the parent. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents.

and more compact, from which it gets its name. The color of the foliage is deeper green than the Boston, more of an olive-green. On account of its strong upright growth, and not drooping like many of the other short Ferns, it is excellently adapted for vases, hanging baskets, and porch boxes. Price, fine plants, 50 cents each.

Nephrolepis Exaltata Bostoniensis (The Boston Fern.)

This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than in the common Sword Fern, and do not stand so stiff, but droop over in a graceful manner. Excellent for making large specimen plants, also very fine for hanging baskets. Price, nice young plants, 10 cents each; larger plants, 25 and 50 cents each.

Nephrolepis Piersoni (Ostrich Plume)

An entirely new form of the famous Boston Fern. The pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful beyond description—feathery, plummy, nothing describes them better than "Ostrich Plumes," which they very much resemble. Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents.

Nephrolepis Cordata Compacta

Compacta Sword Fern

This is a Sword Fern very similar to the Boston Fern, but yet different in a number of characteristics. The growth instead of drooping is upright and more compact, from which it gets its name. The color of the foliage is deeper green than the Boston, more of an olive-green. On account of its strong upright growth, and not drooping like many of the other short Ferns, it is excellently adapted for vases, hanging baskets, and porch boxes. Price, fine plants, 50 cents each.

SPECIAL OFFER No. 176—Your selection of Ferns from this page, excepting Hardy Ferns, to the value of \$1.25 for 95 cents, postpaid.

Chester, Illinois.
The McGregor Bros. Co., Springfield, O.
Dear Sirs:—Received plants. They were in fine order. Your way of putting up plants could not fail to please. May expect my orders in future. (Miss) Mabel.

HARDY FERNS

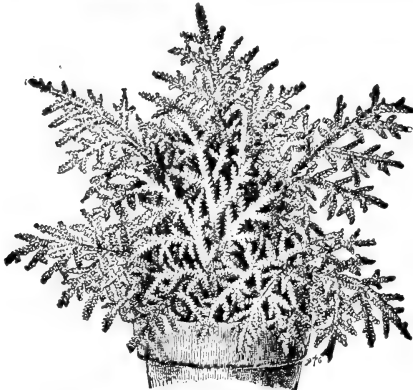

These graceful and universally popular plants are of easy culture, and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. There are many places more or less shut out from the sunlight that may be converted into veritable beauty spots by clumps of Ferns of various kinds, and their intrinsic ornamental qualities are well worthy of our attention. Price, 25 cents each; \$2.75 per dozen, by express only.

Hardy Fern

Ostrich Plume Fern

Selaginella Emilliana

Pteris Tremula

Onychium Japonicum

Pteris Argyrea, Silver Fern

The Beautiful Moss Fern, Seglaginella Emilliana

A new, upright-growing moss, with numerous feathery stems branching from the base and forming a dense tuft. Well grown plants attain twelve to eighteen inches in height. We know of no moss superior to it. We put this moss in with the page of Ferns as the character is very much like the Ferns and is used with them in ferneries. **Price, 10 cents each; \$1.00 per dozen.**

Pteris Tremula

(Shaking Fern.) The foliage of the Pteris varieties is large, very graceful. The slightest movement of the air shakes the leaves of this kind, which we recommend more than any other for house culture, etc. It grows readily and very fast. Keep the leaves from dust and sprinkle slightly every warm day. **Price, 10 cents each; \$1.00 per dozen; large size, 25 cents each.**

Onychium Japonicum

A very beautiful Fern, having long, graceful fronds. The wiry texture of the leaf makes it keep a long time; very useful to cut for vases, etc. **Price, 10 cents each; \$1.00 per dozen; large size, 25 cents.**

The Beautiful Silver Fern, Pteris Argyrea

A very showy Fern, with variegated foliage; fronds large, light green, with broad band of silver-white down the center of each. Very distinct. We have a large stock of this beautiful Fern. **Price, 15 cents each; \$1.50 per dozen.**

Pteris Wimsetti (Crested Fern)

A very pretty and useful Fern for specimen or dish. Green leaves with the ends very peculiarly crested. This Fern is not generally known. It is one of our best varieties for dishes, being a short, compact grower and will stand rough treatment. **Price, 15 cents each; \$1.00 per dozen; large, strong plants, 25 cents each.**

Aspidium Tsussimense

Without question the most valuable of all Ferns yet introduced for Fern dishes; of strong but dwarf and graceful habit; of good color and of better keeping quality than any other Fern we know. A clear, good grower and very ornamental. **Price, 10 cents each; \$1.00 per dozen.**

Pteris Cretica Albo-Lineata

A pretty and useful variegated variety, distinctly showing the clear white variegation. A useful and easily grown Fern. **Price, 10 cents each; \$1.00 per dozen; two for 25 cents.**

Davallia Stricta

A beautiful, strong-grown dwarf Fern, with light green, delicate fronds. It is an easy variety to grow, and an exceptionally fine one for specimen plants or for a dish. **Price, 10 cents each; \$1.00 per dozen.**

SPECIAL OFFER No. 177. One each of the above eight Ferns, making a fine assortment for a Fern dish; plants of the smaller size, 90 cents value for 65 cents, postpaid.

Nephrolepis Cordata Compacta

In our estimation this variety is the finest of all the Sword Ferns; it is of free, strong-growing, compact habit, attaining when fully grown a height of about two feet. The fronds are of a dark green color, very rich, of upright growth, with just sufficient arch in them to make them graceful. For house culture or for window gardening, we do not know of any other variety that would give the same satisfaction and which we could recommend so highly. **Price, 50 cents each.**

Grand Japanese Fern Balls

These pretty Japanese Fern Balls are made in Japan from a special variety of Mountain Fern roots, and moss, and are so constructed as to send out beautiful emerald green fronds from every point until covered all over, and is beyond question the most unique and beautiful of all decorative plants; it is much easier grown than a Palm, and more beautiful, requires no potting or soil, anyone can grow it successfully.

DIRECTIONS FOR STARTING. Soak the ball in tepid water for a half hour, then hang up, repeat every other day until growth is started, after which sprinkle occasionally as required. It needs practically nothing except the proper temperature—which is that of an ordinary living room—and sufficient water to keep it in proper condition; they may be allowed to dry up at any time when desired, set away and start up again by watering as before.

JAPANESE FERN BALLS. 7 to 9 inches in diameter. **Price, 65 cents; two for \$1.00, postpaid.**

JAPANESE FERN BALLS. 5 inches and up. **Price, 40 cents; two for 75 cents, postpaid.**

The Beautiful Gold Fern of Australia

(*Gymnogramma Alstonii*)

This exceedingly novel and beautiful variety bears leaves of a dark green on the upper surfaces, while the under surfaces are richly covered with a deep golden, farinose powder. It is a most striking plant when viewed from beneath, while from above the unfurling young fronds show the rich golden color. Be careful to avoid watering the foliage of this Fern, set the plant in water instead of watering on top. This is quite important in growing this variety. Price, 20 cents each; three for 50 cents.

Cyrtomium Falcatum

We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, yet it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a rose leaf. The fronds are fine for cutting on account of their lasting quality. Price, 15 cents each; \$1.50 per dozen.

Adiantum Venosum, (Maiden Hair Fern)

A very beautiful form of *A. Cuneatum*, having long, graceful fronds, with the ends of the fronds developed into bunching tasseled heads. New Emerald Feather Asparagus, (*Asparagus Sprengerii*)

This is undoubtedly one of the handsomest and most valuable evergreen trailing plants for the house and conservatory ever introduced. It is especially valuable for pots, vases, baskets, etc., covering all with its beautiful sprays of lovely green feathery foliage, which can be cut freely and is very useful for wreaths, bouquets, and all kinds of floral decorations. It makes a charming ornamental plant for the window or conservatory in winter, and is equally valuable for vases, baskets, porch-boxes in summer. It is a strong, vigorous plant, very easily grown, requires but little care and keeps growing, fresh and green, year after year. Price, 15, 20 and 25 cents each; \$1.50, \$2.00 and \$2.50 per dozen, postpaid.

Asparagus Plumosa, (Climbing Lace Fern)

A finer and more delicate plant than the *Sprengerii*, but hardy and easily grown; very satisfactory for window and house culture; extremely graceful window climber, bright green feathery foliage as fine as the finest silk or lace. The fronds retain their freshness for weeks when cut, and are greatly admired for floral decoration. An exceedingly beautiful plant for house and conservatory, and will thrive nicely in the temperature of an ordinary living-room. Ficus Elastica—Rubber Plant

We offer good strong single specimens, with four to five leaves, at 40 cents each. Large specimens, by express, 50 cents, 75 cents and \$1.00, according to age.

Phoenix Roebelinii (Grand Novelty.)

A new Palm is always interesting, but when the new-

comer is easily the most graceful and withal the hardiest, it is little short of sensational. The horticultural world has enthused over this beautiful Palm. It has the grace and lightness of Cocos Weddelliana, but is more robust in growth and has tenfold the foliage of that fine variety. It is essentially different from it, foliage from the ground up gracefully recurved and spreading in habit. It will be most popular for house decoration. Price, 40 cents each, postpaid.

Fine large plants \$1.50 each, by express.

THE SCARLET MEXICAN LILY

SPREKELIA FORMOSISSIMA

The Gorgeous Scarlet Mexican Lily (Grown in Water)

Any description would be inadequate to give a correct idea of the superb brilliancy of the flowers of this Lily. They are a dark velvety-scarlet, shading to maroon and having a satiny-white stripe in the center of each petal. In form more graceful than any Lily we know of. They must be seen to get a proper idea of their gorgeous magnificence. Plant the bulbs either in sand and pebbles covered with water, like a Sacred Lily, or in pots filled with good, rich soil. If planted in the same manner as the Chinese Sacred Lily, the blooms will appear much sooner, but will not last as long as when planted in earth. Try two or three of these bulbs planted together. Price, 15 cents each; two for 25 cents; \$1.25 per dozen, by express.

Large-Flowering White Calla.

The spadix in the center of the flower is of a glossy, purple-black color. Price, good bulbs, 20 cents each; \$2.25 per dozen, postpaid; extra large bulbs, 40 cents each; three for \$1.00; \$3.50 per dozen by express.

Superb Fancy-Leaved Caladiums

Among ornamental foliage plants there are none more beautiful in design or gorgeous in coloring than the Fancy-Leaved Caladiums. They are simply wonderful in the colorings and markings of the leaves. We offer sixteen distinct sorts. Brilliant red and green, green spots and red veins, etc. (See cut) Price, 20c each; three for 50c; set of twelve sorts for \$2.00.

Caladium Esculentum
(Elephant's Ear)

Its very distinct leaves often attain the length of three feet, by twenty inches wide, and have a rich, tropical effect. The growth is very rapid and the ground must be made rich. Watering in dry seasons will help develop large leaves. Bulbs can be stored in dry sand in winter and kept from year to year.

Larger size, 25 cents; four for 90 cents, postpaid; or 20 cents each; five for \$1.00 by express. Fancy-Leaved Caladium

Dwarf Calla
"Gem."

Having given it a fair trial with the ordinary variety known as the Calla Lily the only objection to the old variety is that it sometimes grows tall and scraggy; but the "Gem" is of strong and dwarf habit. The foliage is of a lustrous dark green, is produced in great abundance; its flowers are produced in the greatest profusion, being literally an ever-bloomer. Price, 15 cents each two for 25 cents; \$1.25 per dozen.

McGregor's Brilliant Dahlias

ALL VARIETIES, NEW AND RARE COLORINGS

The Dahlias are well known and much admired plants growing from tender tubers and adapted to bedding in summer. The flowers have a wide range of color, mostly scarlet, orange, yellow, crimson and various shades of other colors. The most suitable soil for the Dahlia is a rough, rich loam, to which has been added plenty of manure and some sand, and spaded into a good depth. Plenty of water is required to keep them in good shape and to produce good bloom, and during a very dry summer the watering must not be neglected. When the frost kills the stalks in the fall, take up the tubers and store in a dry place, covering with a dry earth to prevent them from starting.

Price for any one variety of Dahlias on this page, strong roots, 20 cents each; six for \$1.10; \$2.00 per dozen, postpaid. By express, price, any variety on this page, 15 cents each, \$1.75 per dozen.

HARDY GARDEN LILIES

The beauty of the Lilies appeals to everyone. A really beautiful garden without them is unimaginable; they are needed in quantity and variety to complete it, against evergreens, in groups or lines in the shrubbery, or borders, wherever serene, stately, faultless beauty of outline is required. We here list only those that every good garden really needs. Their culture is simple. Give them good, well-drained soil, with no fresh manures in it, a cushion of sharp sand about their roots and a mulch in winter, with no disturbance of the roots for at least several years. Planted in groups of three to six or more of a kind the effect is much better than when planted singly. Plant at least 8 inches deep, unless the bulbs are very small, for Lilies as a rule are not set deep enough and therefore fail in a few seasons. (Protect all Lilies in winter.)

Lilium Candidum

Annunciation or Madonna Lily—This is one of the most popular of garden Lilies. The flowers are pure snow-white and very fragrant, borne on long stems. They may remain undisturbed for years and thrive well. **Price, 15c. each; three for 40c; \$1.50 per dozen.**

Lilium Speciosum Rubrum or Roseum

Large, wide flowers, recurring more or less at the tips. Very fragrant and hardy; lovely rose and white, spotted crimson. **Price, 20 cents each, three for 50 cents; \$1.75 per dozen.**

Lilium Speciosum Melpomene

A very large, magnificent flower. Rich blood crimson spots on delicately tinted pink petals; much darker and richer in color than Rubrum. **Price, 20 cents each, three for 50 cents; \$1.75 per dozen.**

Lilium Speciosum Album

A variety of the above, with broad, flat stems and immense heads of flowers; pure white and very fragrant; petals gracefully recurved; a very fine sort. **Price, 25 cents each, three for 65 cents; \$2.50 per dozen.**

Lilium Tigrinum Flore Pleno

Double Tiger Lily—This is a plant of stately habit, growing from four to six feet high, bearing an immense number of double bright orange-red flowers spotted with black. **Price, 15 cents each, three for 40 cents; \$1.50 per dozen.**

Lilium Longiflorum

A variety bearing in clusters beautiful snow-white trumpet-shaped flowers of rare fragrance. **Price, 20 cents each, three for 50 cents; \$1.75 per dozen.**

Lilium Auratum

Golden-Rayed Queen of Lilies—The grandest Lily grown. The perfume is exquisite. Magnificent; a well grown plant, carrying five or more blooms, is simply indescribably beautiful. Also known as "Gold-Banded Lily from Japan." **Price, large bulbs, 25 cents each, three for 65 cents; \$2.50 per dozen.**

Lilium Harrisii

Bermuda Easter Lily—The flowers of this magnificent Lily are trumpet shaped, pure white, gracefully formed and delightfully fragrant. The freedom with which the flowers are produced is truly remarkable; even the smallest bulb blooming freely. **Price, large bulbs, 25 cents each; three for 65 cents; \$2.50 per dozen.**

Fairy Lilies—Zephyranthes

Beautiful dwarf bulbous plants, very effective for masses or borders, flowering with great profusion during summer. Are most suitable for pot culture. **ALBA.** Pure white. **Price, 5c. each; 40c. per doz.; \$3.00 per hundred.** **ROSEA.** Large, rose-colored flowers. **Price, 5 cents each; 40 cents per dozen; \$3.00 per hundred.**

Lilium Tenuifolium

The lovely Coral Lily of Siberia. A great beauty. The brightest of all Lilies. Grows twenty inches high, with finely cut foliage, slender stems and beautiful shaped flowers of a brilliant coral-red. Having an enormous stock of this exquisite Lily we are prepared to offer it at the exceedingly low price, **15 cts. each; 3 for 40 cts; \$1.50 per dozen.**

SPECIAL OFFER No. 256.—One each of the Eleven Hardy Garden Lilies on this page for **\$1.75, postpaid, or for \$1.65 if sent by express.** One of the best offers in our catalogue.

McGregor's Imported, Fringed and Crested Tuberous-Rooted Begonias

This charming class of Begonias is perhaps the handsomest of all summer-flowering tuberous rooted plants, and are deserving of much greater popularity. Either as bedding plants or grown in pots, their varied colorings are unique, vivid and gorgeous. Flowers of the largest tubes are of immense size and great substance. From the first opening flower until frost arrives, they are a brilliant setting for any garden. The bulbs we offer are grown by an eminent European bulb specialist, and are all first size blooming tubers, true to colors and markings, and we guarantee that our customers will be fully satisfied with the results from plantings.

They thrive best outdoors in partial shade. Solid beds of ribbon borders are very effective ways for planting. Improvements made in recent years in size, texture and colorings are really phenomenal, producing flowers frequently measuring from four and one-half to six inches across, and colors ranging from the purest white and the most delicate tints of pink, yellow and orange, to the most intense scarlet and richest crimson, while the double-flowering and new crested varieties are perfect, full and double to the center. Not since the Tuberous Rooted Begonias were introduced have novelties of such merit in Begonias been disseminated as the new fringed and crested sorts. A general description would hardly do them justice. They must be seen in flower to be appreciated. They are of the finest types, the petals being heavily fringed on the edges and centers heavily crested.

The culture of Tuberous Rooted Begonias is the simplest. They delight in a rich, mellow, well-drained soil, where they can be liberally supplied with water after they have started into growth, but do best in a position where they will be shaded from the direct rays of the sun during the hottest hours of the day. They succeed equally well grown as pot plants for the conservatory or window garden. On the approach of cold weather, the tubers should be taken up, and after drying, stored away in dry sand or similar material, in a cool place, free from frost until spring.

Price, grand collection per colored plate, one each of six colors for 75 cents, postpaid.

Price, separate colors, your selection, 20 cents each; any three for 50 cents; \$1.75 per dozen, postpaid.

Tuberous Rooted Begonias Single and Double

We have both double and single in five colors—red, white, orange, pink and yellow. **Price, single, 10 cents each; three for 25 cents; \$1.00 per dozen, postpaid; double, 15 cents each; two for 25 cents; \$1.50 per dozen, postpaid.**

SPECIAL COMBINATION OFFER No. 56—All of the collections illustrated in color on the inside and out of the cover and plate of this book, five collections and the grand General Jack Rose. (The Roses of one year size labeled and postpaid for \$2.85.)

COLLECTION No. 57—Same as above excepting Roses of two-year-size. (Five Collections and the grand General Jack Rose labeled and postpaid for \$4.10.) The Five Collections and the grand General Jack Rose, by express prepaid, to any point in the United States for \$4.60.

McGregor's Superb Double Flowering Hollyhocks

The Hollyhocks are among the most stately of our garden plants. The colorings vary in shade from pure white to the darkest red, and are easily the most attractive feature of a garden of flowers. They make the most attractive spots in a hardy garden, and a clump or line give an effect not obtainable with any other plant. For planting among shrubbery or forming a background for other flowers, they are without equal. The double sorts form perfect rosettes of the most lovely shades of color. They do best

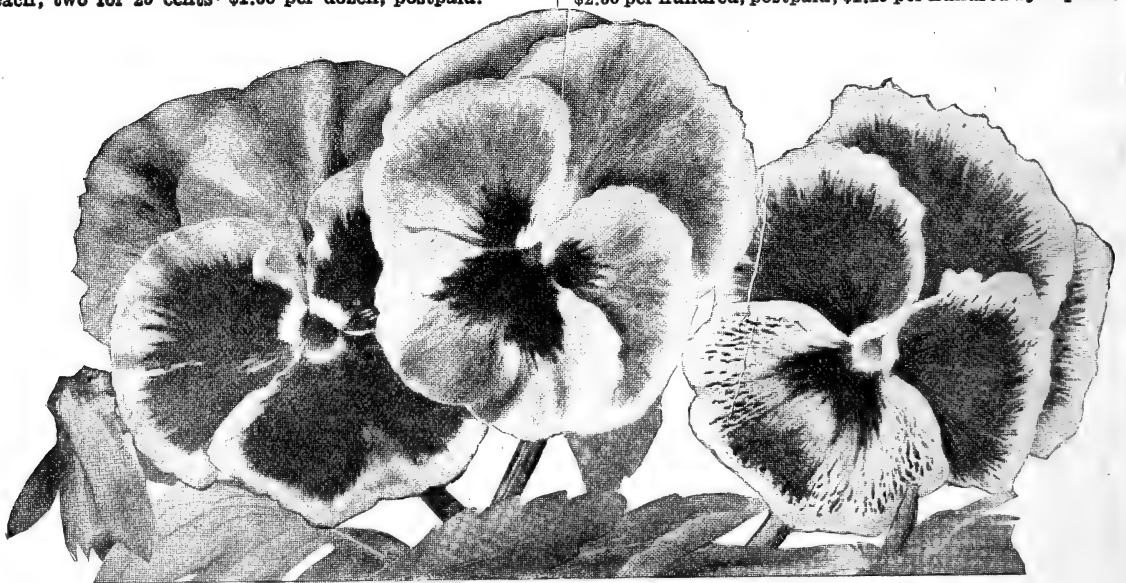

in a rich, deep, well-drained soil, and will repay in quantity and elegance of bloom any special care given them. Careful protection should be given the plants through the winter, so that water may not stand around them in any way, and freeze out the roots. We offer

Price, collection per colored plate, one-year plants, one each six colors, for 60 cents, postpaid. Same in two-year plants, for \$1.00, by express.

Price, for separate colors, your selection, 15 cents each; any three for 40 cents; \$1.50 per dozen, postpaid. Same strong two-year plants, separate colors, your selection, 20 cents each; \$2.25 per dozen, by express.

McGregor's Mammoth Flowering Butterfly Pansies

There is no flower more beloved, admired and even adored, than the pansy; no flower border, be it ever so gay and gorgeous, is so interesting. The combination of colors in the same flowers is exquisite and wonderful, and yet so delicate that no description can convey an adequate idea of their beauty, embracing so many varieties—striped, spotted, bordered and fringed; in rainbow colors, with rich, velvety textures; some light yellow with deep violet spots, the upper petals carmine, edged with white; yellow with crimson-maroon spots and blue rims; deep blue with yellow center, edged black; violet with white center and carmine edges; brown and golden-bronze; jet black; ultramarine blue; pure white, intense yellow. Its culture is not at all difficult and may successfully be attempted by anyone inexperienced in horticultural affairs. Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Geraniums could be even planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well-rotted manure and soil. **Price, 40 cents per dozen; \$2.50 per hundred, postpaid; \$2.25 per hundred by express.**

McGregor's *Hardy Perennials* for the Garden
Or the Old Fashioned Garden Flowers

Hardy Perennials are those plants which die down in winter but start again in the spring from the root, lasting many years and flowering every year. Never before have they been so popular, and from present indications of a desire for hardy plants, the demand for them will continue to increase, which will make them as popular in the United States as they have been in

the horticultural centers of Europe for many years. Some are very useful for screens, some for hedges, rockeries, steep banks and terraces, others for bedding, edging and bordering and cemetery planting; then again others are fine for cutting to be used as table decorations. Cultivation is of the simplest, beginning with any good garden soil for a foundation, which may be enriched with any good fertilizer, such as well decomposed manure or bone meal, deeply dug, well pulverized, in which the plants should be set as early in the season as possible, so as to enable them to become well rooted and established before hot, dry weather sets in, keeping the ground well stirred, and where it is not convenient to water the beds during hot, dry weather, a mulch of any loose material which will keep the soil from baking will be found beneficial.

Hardy Phlox

This notable family of hardy perennials is perhaps the most widely known and popular of all the various plants which we have in our gardens, and each year finds the newer and showier varieties increasing through the hybridizer's skill. Certainly no perennial is more worthy of culture, more satisfactory in every situation, or more effective, planted individually or in groups. All Phlox are well adapted for cutting and are exceedingly floriferous. The plants bloom in midsummer and the gardens can be kept aflame from June until frost. All colors in shades delicate and rich, with flowers ringed, eyed and shaded. They succeed in good garden soil, but are greatly improved by being liberally manured. When in flower they should be watered freely. Phlox usually flower in July and August, and in order to render them autumnal-flowering it is necessary to pinch the shoots about the first of July. Plants will then flower in September. For early flowers, leave the plants unpinched. The best time to plant Phlox is in the autumn. The strong plants we offer will flower freely next season.

Newest Phlox

The following varieties, 15 cents each; three for 40 cents; six for 75 cents; \$1.25 per dozen.

Single Sweet William

R. P. STRUTHERS—In our estimation the very best Phlox grown today—it has no faults. Color clear cherry-red, suffused with salmon shades; deep red eye; fine large truss. The color is so clear and clean that each individual floret stands out as distinct as a cameo.

MISLINGARD—A grand, free-blooming white.

ECLAIREUR—Purplish-crimson, with light halo; a magnificent and fine large flower.

IRIS ("Fleur De Lis") The National Flower of France

Sometimes known as "Flags" and often spoken of as "Fleur de Lis." Popular herbaceous plants that come up year after year, and each season stronger and more floriferous than the previous.

They grow in clumps and do well in almost any soil; are desirable in borders and shrubbery and are beautiful in beds and groups by themselves, and for planting along water edges. The flowers embrace a variety of colors and innumerable tints of blue, yellow and white. Those of the German forms are not so delicately colored, nor are they so large as the flowers of the Japanese varieties. They bloom the latter part of May and are through flowering the last of June, when the Japanese Iris are brilliant with their wealth of flowers. Both are needed to give a continuous effect from May to July.

German Iris (Iris Germanica)

In this species the inner segments of the flower are broad and stand upright, forming a beautifully crested flower instead of a flat, expanded one, as in the Japanese. The plants bloom in May and June, several or many flowers to a stem, much taller than the leaves, which are silvery-green and sword-shaped. They make beautiful veranda plants if lifted from the garden and placed in jardinières. Price, 10 cents each; \$1.00 per dozen.

Japanese Iris

(Iris Kaempferi Grandiflora)

These magnificent Iris are among the most beautiful of our summer flowering plants, and rival the orchids in their colorings. The prevailing colors are white, crimson, rose-lilac, lavender, violet and blue. Each flower usually contains several shades, while a golden-yellow blotch at the base of the petals intensifies the wealth of coloring. While the Iris succeeds in almost any soil and condition, it delights in a rich, deep, moist position. Price, double and single flowered, named varieties, 25 cents each, postpaid; ten distinct sorts for \$2.00 by express.

Hibiscus (Mallow)

The Best of Flowering Shrubs

Whether planted individually or collectively, the shrub is an important feature in the adornment of any grounds. There are locations which suggest the planting of individual shrubs, which are allowed space for symmetrical development, and in such locations their grace and beauty cannot be surpassed. In groups they can be made to emphasize some feature of the lawn, to screen some unsightly object or to destroy the strong stiff lines of foundation walls. At the edges of the lawn, along walks and drives, or in distant corners, a collection of shrubs may be gathered together that will give a succession of bloom from the opening of spring until frost comes to destroy the flowers. Shrubs with purple and yellow leaves should be added, to give character and contrast to the planting. When the leaves have gone, the brilliant fruits of other species and bright, conspicuous bark of certain shrubs add variety and interest to the monotony of winter.

The assortment we offer includes varieties suited to every purpose, and our strong, well-rooted plants produce immediate effects.

To those whom it is not convenient to receive shipments by express, we will send by mail, postpaid, any of the shrubs on pages 69, 70, 71 or 72, except where noted. We recommend

Beautiful Hardy Ornamental Vines

Hardy English or Large-Flowered Clematis

NOTE—The Large-Flowered or Hardy English Clematis are considered the most beautiful of all our flowering Vines. The flowers are large, often measuring four to six inches across and are borne in great wreaths and clusters during July and August. The colors range from rich royal purple to pearly-white. The vines are of slender, wiry growth and require some support that they can twine around, like a rod, pole or wire, and if the location is somewhat moist and partially shaded, so much the better; the north side of the house or porch is often the best place for them; hardy, but a mulch of leaves or litter around the roots at least the first season, will be an advantage.

Climbing vines are as necessary to the comfort and beauty of a home as the trees and shrubs we plant about it. They mature quickly and tone down the stiff, bold angles of new buildings, and give shade and flowers over porches and trellises. They are cheerful and cooling in climbing over bowers and summer-houses, and wild and natural in running over trees and stumps. In shaded places and beneath old trees where grass will not grow, they are often used as a ground cover. On steep slopes and banks they prevent erosion. They ramble over unsightly, neglected places and make them beautiful with fragrant and brilliant flowers. Vines are strong, robust growers that require little attention other than to occasionally train them. We offer a comprehensive collection of the hardiest and best vines, those that have real merit and sterling worth. All vines delight in a deep, fertile soil with ample moisture, and the ground for

them should be thoroughly prepared and trenched. Too often this is neglected and the plants set out in a mixture of subsoil and brickbats from the foundation excavations and building refuse. In general, evergreen vines prefer shade and cool exposures, and should be planted on the northerly sides of buildings or trellis. Deciduous vines, on the other hand, thrive best in the sunny positions. It is a good plan to carefully work into the surface soil at the base of the vines a quantity of well-rotted compost in late autumn or early spring, thereby supplying an ample amount of fertility and insuring a strong, vigorous growth, without which these charming plants are both disappointing and commonplace.

Aristolochia Macrophylla

(A. Siphon, Dutchman's Pipe.)

A grand hardy vine, producing a splendid dense shade. Grows in a wild state from Minnesota and Pennsylvania, southward to Kansas and Georgia. Leaves very large and broad, bright green. Flowers purplish and yellow-green, solitary or two or three together, from the axis of the leaves, resembling a Dutch tobacco pipe. **Price, strong plants, 40 cents each; \$4.50 per dozen, by express.**

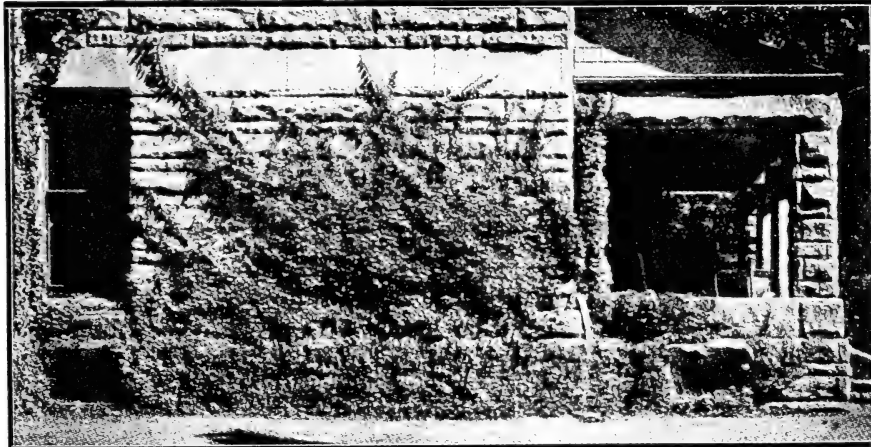

Ampelopsis Veitchii

(Sometimes called "Boston Ivy" and "Japan Ivy")

Entirely hardy in the most exposed places, attaining a height of twenty to thirty feet in two or three years, clinging to stones, brick or wood work with the greatest tenacity. It is a great protection to houses, as the leaves, lapping over each other like slates on a roof, effectually prevent rain from penetrating the walls. For covering dead trees, gateposts, boundary walls, etc., it has no equal. In the summer the foliage is a rich shade of green, but in the fall it assumes the most gorgeous tints of scarlet, crimson and orange. Truly a grand sight. **Price, nice young plants, 15 cents each; \$1.50 per dozen; extra strong two-year-old plants, 25 cents each; \$2.50 per dozen.**

Akebia Quinata

A fast-growing, perfectly hardy and one of the most graceful hardy climbers, with deep green foliage, producing in large clusters bunches of violet-brown flowers which have a pleasant cinnamon odor. Fine for covering trellises and verandas. **Price, 15 cents each; \$1.25 per dozen.**

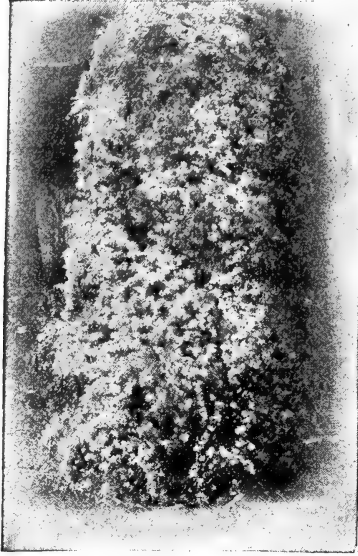

Ampelopsis Veitchii (Boston Ivy)

Ampelopsis

Quinquefolia.

(Virginia Creeper)

Leaves compound, consisting of five bright green toothed leaflets, fading in autumn with gorgeous tones of red and scarlet. Berries blue, produced in ample panicles. A handsome and graceful species. **Price, strong plants, 25 cents each, \$2.50 per dozen.**

Leaves compound, consisting of nine to eleven oval dark green leaflets. Flowers in large terminal clusters, orange-red within, scarlet without, two to three inches long. Hardy as far north as Missouri and Massachusetts. **Price, 25 cents each; \$2.00 per doz.**

Chinese Hardy Matrimony Vine

A strong and vigorous hardy climbing plant, and in a short time after planting is covered with bright purple flowers, which are succeeded by bright brilliant scarlet berries nearly an inch long, and every branch being covered with them. The berries ripen in autumn and remain on the vine late into the winter. **Price, 15 cents each; \$1.50 per dozen.**

Matrimony Vine

WISTARIA—The Wistarias.

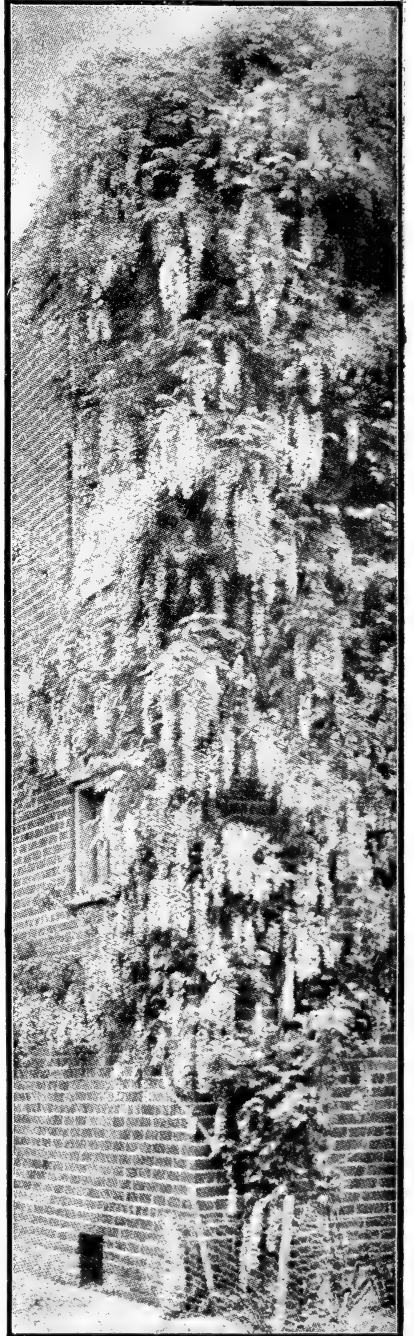

Grand free-flowering vines with handsome showy flowers. They are among the best and hardiest of ornamental vines, and are well adapted for training on porches, arbors or trellises. For their best development a deep rich loamy soil should be provided by trenching and enriching, for they amply repay for any favors of this kind. When well established, a greater profusion of blossoms may be secured by rather severe pruning, cutting back the lateral shoots to short spurs, but the gain in flowers is perhaps at the sacrifice of picturesque and natural grace and beauty.

Wistaria Chinensis Chinese Wistaria

A rapid growing tall vine with handsome foliage and flowers. Native of China. Leaves compound, consisting of about eleven pale green leaflets. Flowers pea-shaped, purplish, profusely borne in dense drooping clusters seven to twelve inches long, opening in mid-spring. Very showy and desirable. **Price, 25 cents each; \$2.50 per dozen.**

Flowers white, changing to yellow, deliciously fragrant, borne in great profusion in the summer and occasionally in the autumn. Grand for trellises and ground cover. One of the best.

L. JAPONICA AUREO RETICULATA, Golden Leaved Honeysuckle—A form of the preceding species with the leaves beautifully netted with yellow.

L. PERICLYMENUM BELGICA (L. BELGICA), Monthly Fragrant Honeysuckle—A form of the last of more vigorous habit, with bright red flowers freely produced throughout the summer. A grand plant.

L. SEMPERVIRENS, Trumpet or Coral Honeysuckle—A high-climbing vine with stems ten to fifteen feet long. Occurs naturally from Connecticut and Nebraska, southward to Florida and Texas. Leaves oval or oblong, green or bluish-green above, glaucous beneath, the uppermost united at their bases. Flower scarlet, about two inches long, profuse and very showy. Splendid for porches.

Passion Vine

Passifloras, Passion Vines

A class of rapid-growing climbing plants well adapted for house culture in winter or for training over porches, etc., during summer. The flowers are about four inches in diameter, with petals star-shaped and very symmetrically arranged.

CONSTANCE ELLIOTT—The flowers are pure white, excepting a very slight coloring at the base of the corolla. Price, 15 cents each; two-year-old plants, 25 cents each

CERULEA (BLUE)—The hardier variety of the two, standing the winter any place south of the Ohio River. Color a beautiful shade of blue. The flowers are large and very symmetrically arranged. Price, 15 cents each; two-year-old plants, 25 cents each.

Cobea Scandens

A beautiful climber of rapid growth; large purple cup-and-saucer shaped flowers. For covering arbors, trellises, etc., it is unsurpassed; will cling to any rough surface. Price, 10 cents each; \$1.00 per dozen.

Cinnamon Vine

Perfectly hardy, the stem dying down every autumn, but growing again so rapidly in the spring as to completely cover any trellis or arbor very early in the season. It is produced from tubers that will make from ten to twelve feet of vine, having beautiful heart-shaped leaves bright green, peculiar foliage, and clusters of delicate white flowers, sending forth a delicate cinnamon odor. Price, 10 cents each; three for 25 cents; \$1.00 per dozen.

PUERARIA, The Kudzu Vine—A hardy and remarkably vigorous vine, frequently producing stems forty to sixty feet long in a single season—a veritable Jack-and-the-Bean-stalk. In the North the plant dies down to or near the ground in winter, but in the South the vines are woody and often of considerable diameter. Well adapted for covering arbors or verandas, especially where rampant vines and large, bold leaves are required. Thrives in almost any well-drained soil, preferring sunny situations. Leaves compound, consisting of three bright green ovate leaflets. Flowers pea-shaped, purple, produced in axillary racemes from the older woody stems in late summer. Native of China and Japan. Price, 15c each; \$1.50 per doz. (See Nursery Department for express size plants.)

FRUIT TREES

THE Fruit Trees offered are young and thrifty and will make very rapid growth and very quickly. Young Trees are to be selected in preference to old and very large ones; the roots are more tender and more fibrous and bear transplanting better and are more apt to live, they can also be trimmed and shaped into any desired form and in the course of a few years will easily outstrip the older ones in growth.

If not prepared to plant your trees when received, "healing in" by digging a trench deep enough to admit all of the roots and set the Trees therein, carefully packing the earth about the roots and take up when required. Remember not to leave the roots exposed to sun or air.

FLOWER SEEDS

McGregor's Selected Flower Seeds

We have used the greatest care in obtaining our Flower Seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planting may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, toes cure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering the seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

New Giant Cyclamen "Margaret"

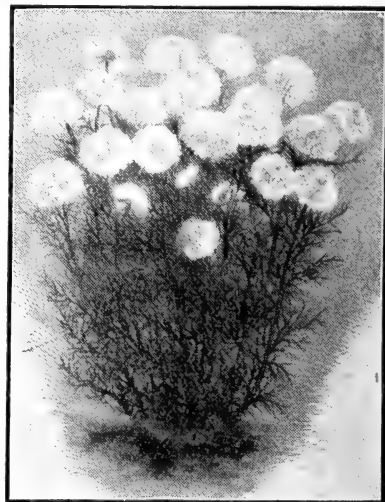

Forget-Me-Not (Myosotis) Ruth Fisher

New Forget-Me-Not (Myosotis) Ruth Fisher

This fine new Forget-Me-Not which took first prizes in all the flower shows of Europe last year, is a neat, compact plant with large sprays of bright light-blue flowers raised strongly above glossy dark green foliage. The flower sprays are the largest ever known in Forget-Me-Nots, and the color the truest blue. Extremely hardy and will stand the coldest climate. **Price, 20 cents per packet.**

New Dwarf Nasturtium Burpee's "Golden-Midnight"

One of the most beautiful novelties yet introduced. Fine compact plants blooming profusely from early summer until late frost. From an artistic point of view, the contrast between the clear golden-yellow foliage and extremely dark flowers is most remarkable. The foliage is lighter yellow than either Cloth of Gold or Golden Queen, while the flowers are such intensely deep maroon as to seem almost black—hence the name "Golden-Midnight." (See illustration page 97.) **Price, 15 cents per packet.**

Chrysanthemum "Bridal Robe."

New Annual Chrysanthemum, "Bridal Robe."

Of very compact and upright habit, and not exceeding ten inches in height, the sturdy plants throw out their finely feathered foliage from the base and deck themselves with a mantle of extra-double pure white flowers. Flowers are like large double Daisies and are massed on the plants, fine for cut flowers. One of the best bedding plants yet introduced. **Price, 10 cents per packet.**

For Novelties in Sweet Peas See Pages 102 and 103.

FLOWER SEED NOVELTIES AND SPECIALTIES

"Rosamond"

This is one of the most beautiful border plants ever introduced. It forms a compact, bushy plant, completely covered with trusses of pure rose-colored flowers of great brilliancy. Flowers attractive in color and of delicious fragrance. Blooms constantly until late in the fall. **Price, 15 cents per packet.**

New Fringed Petunia, "Pepita"

In this new Petunia we have a particularly beautiful combination of colors, rich deep carmine-scarlet with border and splashes of pure white. This variety is more finely fringed and ruffled than any other variety. The flowers are indescribably charming and very large. **Price, 25 cents per packet.**

Beautiful New Petunia, Erfordia, or "Rosy Morn"

This new variety belongs to the small free-flowering section, and forms nice bushy, fairly dwarf plants, which are covered from early summer till hard frost with brilliant carmine-pink flowers, with white throat and center. For beds, baskets, vases and the many other uses to which the Petunia lends itself, this is one of the most attractive. **Price, 10 cents per packet.**

Poppy Dainty Lady

Two Beautiful New Single Poppies

"Admiral"

This single Peony flowered Poppy is of surprising beauty. It is characterized by large, round smooth-edged flowers of glistening pure white, with a broad band of brilliant scarlet around the top, occupying a full quarter of the corolla. These two colors form an extremely telling contrast. **Price, 10 cents per packet.**

"Dainty Lady"

This fine new Poppy is certainly well named, for its color is truly exquisite rosy-lavender with a shining dark metallic blotch at the base of each petal. It grows about two feet high and bears a profusion of silky petaled flowers which measure four to five inches across. One of the most charming novelties of the year. **Price, 15 cents per packet.**

Beautiful New Violet, "Peacock"

This is distinctly new, very different from any violet yet introduced. It is a large full flower, as large as a small Pansy, borne on long stems high above glossy dark green leaves. In color it is white shading to palest lavender in the center, the whole flower striped with hair lines of brilliant blue radiating from the center. The plants are literally a mass of flowers. **Price, 10 cents per packet.**
